Dorfie Fit

A product by Dorfie Labs

Holistic.Connected.Community Driven Fitness

Why your current tools are failing you

Most gym software was built to bill members, not keep them.

- It records what happened but can't warn you what's coming
- Billing, bookings, hiring and community sit in 4 to 6 disconnected tools
- Members get an app that feels like an invoice, not a reason to show up

You're not running a gym on software. You're running it on patchwork.

Why Dorfie Fit

A gym is a community with equipment, not equipment with members.

- Holistic: operations, members, trainers and talent in one system
- Connected: live data flowing across your entire gym
- Community-driven: engagement built into the product, not bolted on

Gym management, zero chaos

- Memberships, renewals and automated reminders
- Billing, payments and invoicing
- Attendance, check-ins and class scheduling
- Staff roles and permissions
- One command centre instead of six tools
- Trainer Mangerment
- Under the table PT detection
- Dynamic in-gym live members data

Live tracking, not rear-view reporting

- Know who's slipping this week, not who left last quarter.
- Real-time check-ins and gym occupancy
- Churn alerts when a member's attendance drops
- Live member progress and trainer performance
- Peak-hour and revenue insights you can act on today

Hiring, your unfair advantage

- Your gym is only as good as your trainers, and no other gym software helps you find them.
- Reach verified trainers and staff directly
- See certifications and experience upfront
- Hire, onboard and schedule inside the same platform

Community and member experience, your moat

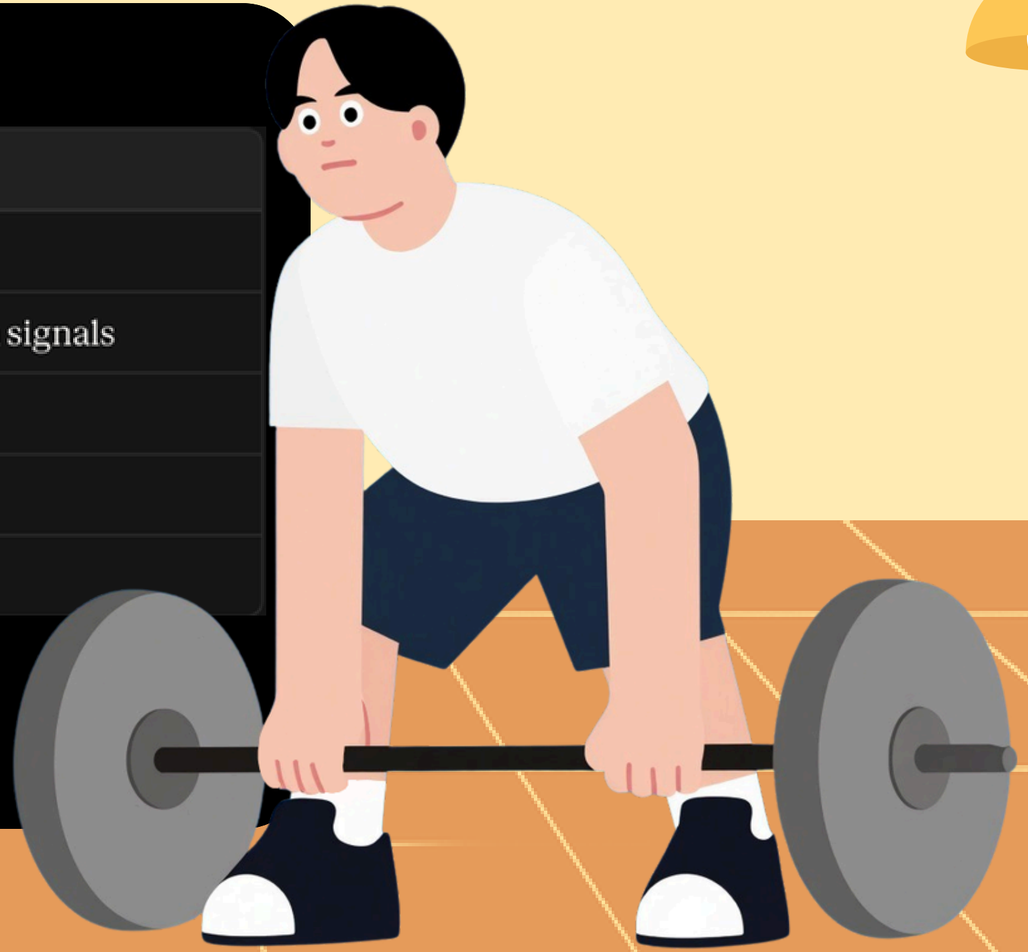

Members cancel memberships. They rarely leave communities.

- Challenges, leaderboards, events and milestones
- Personalised workout and wellness plans
- Your gym's own branded app
- Easy booking, payments and notifications

Dorfie Fit vs. the rest

	Typical gym software	Dorfie Fit
Purpose	Billing and bookings	Retention and growth
Data	Reports after the fact	Live tracking, real-time churn signals
Hiring	Not included	Built-in talent pipeline
Community	Optional add-on	Core to the product
Tools needed	4 to 6	One platform
